

Coordinating Council Awards

The Coordinating Council Award recognizes outstanding technical committee contributions to the ITE Coordinating council program. Selection is based primarily on the significance of the committee's contributions to the transportation engineering profession, the extent to which it met its objective, and the value and usefulness of the form in which its work is reported.

The Coordinating Council Best Project Award recognizes the best technical product resulting from work developed, completed and sponsored by a Council in the previous calendar year. This award is not limited to only volunteer projects.

The Coordinating Council Outstanding Volunteer Special Recognition Award is given to an individual that has demonstrated significant and sustained volunteer performance in ITE technical activities.
